

GN Audio Quality Policy

We aim to foster a quality culture with the objective to develop, manufacture and market products and services with superior quality and sustainability.

Management and employees will achieve this purpose by living the GN Values and ensure to:

- Focus on customer satisfaction by understanding requirements and insights, to deliver relevant products exceeding expectations
- Challenge ourselves and our suppliers enabling to continuously improve our quality management systems
- Promote a quality mindset amongst all employees and partners through standards, education, supervision and effective communication
- Practice process approach of handling activities and resources with factual decision making and risk-based thinking
- Comply with relevant laws, regulations and internal requirements to promote sustainable practices
- Continuously monitor internal and external data sources to understand current quality levels
